# COMPANY PROFILE

Trion is an ADNOC approved vendor, specialized in Manufacturing, Maintenance, and Procurement needs of Oil & Gas Industry, Marine Engineering, Mechanical Contracting, Valve Servicing, Stainless & Mild Steel (SS & MS) valves, and Manifold Fabrication of all sizes & Hydraulic works etc. We also do all types of fabrication and our service range covers all segments related to the Industry and Services as per DNV & other International Standards as required by our Clients.

## VISION

Our Vision is to be the market leader by providing customers with the competitive price and best service at all times.

*To attract and retain quality competent employees who excel in their career, demand excellence from themselves and their fellow workers.*

*Integrity will not be compromised for customer requirements or our team of dedicated and career-minded employees*

## & MISSION

Our Mission is to be a one-stop center for all your Fabrication & Service related job in the industries of Construction, Marine, Oil Field & Engineering across the U.A.E.

# ABOUT COMPANY

We are a company based both in Abu Dhabi and in Jubail – Saudi Arabia, dedicated to the Maintenance and Procurement needs of Oil & Gas Industry, Marine Engineering, Mechanical Contracting, Electrical Works, Valve Servicing, Generator Services, Stainless Steel Fabrication, Hydraulic Works etc. across the region.

Our mature group of fabricating specialists has decades of hands-on experience and the team is fully versed in the latest technologies, 3D modelling, and programming tools. From initial design to painting and finishing, we do it all. Many of our customers have been with us for long times and we are proud to say that, our customer satisfaction rating is consistently above 97%.

# OUR HISTORY

## Yesterday

Almost every business, big or small, began as a startup at one point. In the beginning, most of them also had a shoestring budget and little investor interest but with high ambitions. Likewise, an ambitious outlook by two friends during 2017 made the humble beginning of Trion. However, during these years, Company had sailed through many tides including the rough turbulences of Covid which shook us in 2019. Still, we managed to survive and the voyage is on for further miles to conquer.

## Today

Five years ago, Trion was formed as a “one shuttle shop with a three men army” doing small scale fabrication and servicing jobs. Today, we still do some fabrication and servicing jobs as well as “more” integrated and end-to-end fabrication solutions and much “more”. The “more” is providing the very best customer service, customer experience and company culture. We aim to inspire our industry and customers by showing it's possible to simultaneously deliver happiness to customers, employees, vendors and to the community in a long-term sustainable way. By focusing on its strengths, its key customers and the company's underlying core values, Trion will certainly increase its presence not only in Abu Dhabi but in the region as well, as we just now made our footprint in Jubail – Saudi Arabia.

## Tomorrow

The business plan leads the way by renewing our vision and strategic focus of adding value to our target markets segments – mid and high value segments of the industry. It also provides step-by-step plans for improving our client base, sales and profitability.

# OUR SERVICES

## Fabrication Shop

We customize and fabricate steel parts as per specific requirements. Our capabilities include Flame Cutting, Forming, Tube Bending, Welding and Powder coating. We specialize in stainless steel, MS and Aluminium metals. We are capable of building steel structures in almost all sizes. We provide all kinds of welding quality, tight material control and fast production.

## Machining Shop

One of the most advanced and skilled workshop of its kind in the region. We repair & service of all kinds of heavy equipment with Mechanical, Engine, Hydraulics and Electrical defects with the help of our experienced and highly trained staff. We believe in guaranteed quality jobs & prompt services at competitive prices to all customers.

## Paint Shop

The requirements of a commercial / industrial painting job demand a high disciplined and focused approach from the very start. Our team of painting specialists are committed to delivering a quality experience and professional results in every project, every time. Trion provides a wide range of industrial painting services - including sand-blasting, allowing for a smooth and seamless experience and exceptional results.

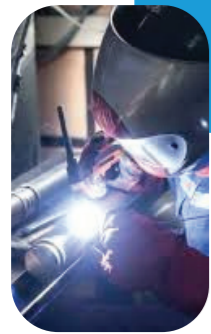

## CNC Machine

We have a comprehensive cnc cutting and bending machine which owns full functions and widely used in the industry for precision and accuracy. We have the new and latest version of sensor needle, which outlines the shape of an oval washing basin by touching the sides.

# SERVICES CONTINUED

## Stainless Steel Welding

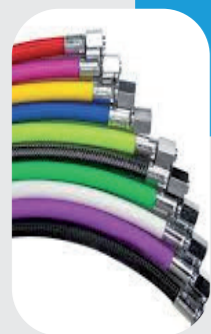

It is a key element in the fabrication of many stainless steel products. Moreover, the welding of stainless steel is different, but not necessarily difficult.

Therefore an understanding of the basic principles will assist in greater productivity in fabrication, operational integrity and efficiency and, if required, maintenance.

## Flange Management and Bolting

Controlled flange management is a recognized technique for leak prevention in bolted flange assemblies. Across a number of industries maintenance and pre-commissioning schedules are prioritizing flange management from design in order to develop start-ups that are leak-free.

## Hose Shop

Specialised in all types of hydraulic, air, gas oil, water, breathing air, oxygen, stainless steel flexible convoluted hose, S.S. Expand bellows assy. We connect any kind of fluid with ample work experience in U.A.E.

## Hose – On Site Convenience.

Our Mobile Hose Van operator will handle the entire job onsite from removal to installation and be able to address other hose related maintenance issues if needed. Our technicians are uniquely skilled to assemble and install hose and coupling products on most brands of equipment using the latest tooling, assembly information, routing standards, inspection techniques and contamination control processes.
